AI ATS Resume Analysis Report

Generated on 01 July 2026 | 12:34 PM

ATS Score	44%
Grade	F
Recruiter Verdict	Needs Improvement

Matched Skills

- ✓ CSS
- ✓ Docker
- ✓ Git
- ✓ GitHub
- ✓ HTML
- ✓ JavaScript
- ✓ NumPy
- ✓ Pandas
- ✓ Python
- ✓ RAG
- ✓ React
- ✓ SQL

Missing Skills

- ✗ AWS
- ✗ Algorithms
- ✗ Data Structures
- ✗ Deep Learning
- ✗ Flask
- ✗ Generative AI
- ✗ Kubernetes
- ✗ LangChain
- ✗ Linux

- ✗ Machine Learning
- ✗ MongoDB
- ✗ Object-Oriented Programming
- ✗ PyTorch
- ✗ REST API
- ✗ TensorFlow

Strengths

- Your strong foundation in web development with skills like CSS, HTML, JavaScript, and React will help you tackle a wide range of projects.
- Your experience with version control systems like Git and GitHub showcases your ability to work collaboratively and manage code effectively.
- Your proficiency in data manipulation using Pandas and Python suggests a strong analytical mindset, which can be applied to various domains.

Weaknesses

- The lack of cloud infrastructure skills like AWS and Kubernetes may limit your ability to work on large-scale projects or deploy applications efficiently.
- Your missing skills in machine learning and deep learning frameworks like TensorFlow, PyTorch, and Keras could hinder your growth as a data scientist.
- Not having experience with database management systems like MongoDB may restrict you from working on projects that require robust data storage solutions.

AI Suggestions

- Consider taking online courses or attending workshops to learn more about cloud infrastructure and deployment using AWS and Kubernetes.
- Invest time in learning popular machine learning libraries and frameworks, such as TensorFlow, PyTorch, and Keras, to enhance your skills as a data scientist.
- Practice working with database management systems like MongoDB to gain hands-on experience and improve your ability to design and implement efficient data storage solutions.
- Explore Flask or other lightweight web frameworks to broaden your understanding of application development and deployment.
- Look for projects that involve natural language processing, object-oriented programming, or generative AI to demonstrate your skills in these areas.
